Professional Summary

An web front-end developer and UI/UX designer are well experienced in web app designs which have responsiveness and usability. Currently, I am pursuing an Applied Degree in Software Engineering-gather practical experience with modern frameworks, design principles, and collaborative development. I am excited about future possibilities of merging those two forms of expertise into seamless and fluid digital experiences, with constant learning experience in the field of software engineering.

PROJECT

Meals on Wheels: Full-stack app for meal scheduling, coordination, and delivery management. Built/administered backend & frontend with features like menu editing, user management, CSV reports, dynamic registration, and dashboards. *Tech: Tailwind, React.js, Spring Boot, MySQL, JavaScript.*

Dobu Martial Arts: Multi-page responsive website with membership management, class schedules, and social media integration. *Tech: HTML, CSS, JavaScript, JQuery.*

North Sussex Judo: Cost-calculation program generating itemized monthly invoices for training and competition fees.
